# ABOUT US

MORE WORLDWIDE EXIM specializes in the processing and export of high-quality herbal and botanical powders for international markets. With a focus on hygiene, precision processing, and quality consistency, we cater to buyers across food, nutraceutical, cosmetic, wellness, and herbal industries.

Our facility follows controlled processing methods to retain the natural properties of raw materials while ensuring they meet global export standards. We offer flexible customization in mesh size, packaging, and private labeling to suit diverse industrial requirements.

- ✓ Hygienic processing environment
- ✓ Strict quality & batch testing
- ✓ Bulk & private label supply
- ✓ Custom grinding & mesh size
- ✓ Export-compliant packaging

Documentation such as COA, MSDS, and detailed product specifications are available upon request for all products.

# QUALITY & COMPLIANCE

At More Worldwide Exim, quality is not limited to the final product. It is built into every stage of our processing workflow — from raw material sourcing to final export packaging, ensuring international safety and compliance.

## RAW MATERIAL SOURCING

We procure herbs from verified farms where harvesting practices preserve the natural integrity of the raw material. Only carefully selected batches are approved.

## CLEANING & SORTING

All materials undergo thorough cleaning and manual sorting to remove impurities, foreign particles, and inconsistent materials before processing begins.

## CONTROLLED GRINDING

Herbs are processed under monitored conditions to retain color, aroma, and nutrient composition while achieving the precise mesh size required.

## METAL DETECTION

Every processed batch passes through advanced metal detection equipment to ensure complete safety and the removal of any metallic contaminants.

## MOISTURE CONTROL

Moisture levels are strictly monitored and controlled to ensure stability, extended shelf life, and suitability for international export.

## BATCH TESTING

Each batch is rigorously checked for consistency in texture, color, and chemical parameters before final approval for packaging and dispatch.

## EXPORT PACKAGING

Products are packed in moisture-protected, food-grade, and export-compliant packaging designed to preserve quality during long-distance transit.

## DOCUMENTATION

Custom documentation including COA, MSDS, and detailed product specifications are available upon request for all products.

# MORINGA LEAF POWDER

## ABOUT THE PRODUCT

Moringa Leaf Powder is produced from carefully selected leaves that are naturally dehydrated and processed under hygienic, controlled conditions to preserve their original color, aroma, and nutrient composition. The leaves are finely milled into a smooth, free-flowing powder suitable for multiple industrial applications.

## KEY APPLICATIONS

- Health supplements
- Functional foods
- Protein mixes
- Nutraceutical formulations
- Herbal blends
- Cosmetic care

## PRODUCT SPECIFICATIONS
