About More Naturals

More Naturals is a specialized exporter of naturally distilled floral waters and botanical extracts crafted for cosmetic, skincare, wellness, and personal care industries worldwide.

Our approach blends traditional distillation knowledge with modern hygienic practices to preserve the purity, clarity, and natural aroma of every batch we produce.

Rose water, one of our signature offerings, is carefully steam distilled from fresh rose petals without the use of additives, alcohol, or synthetic enhancers, making it ideal for premium formulations.

Our Philosophy

- Respect for natural botanical processes
- Controlled and hygienic distillation
- Commitment to purity without additives
- Immediate processing after harvest
- Preservation of natural fragrance

SKINCARE • COSMETICS • WELLNESS • AROMATHERAPY • FOOD & BEVERAGE •
HERBAL FORMULATIONS

Documentation such as COA, MSDS, and detailed product specifications are available for every batch upon request, ensuring complete transparency for global buyers.

01 / INTRODUCTION

The Art of Steam Distillation

Our rose water is created through the traditional method of steam distillation using freshly harvested rose petals. This gentle process captures the true aromatic essence of the rose without altering its natural composition.

04 / CONDENSATION

Condensation & Collection

Steam infused with rose essence is cooled and condensed into liquid form, producing pure rose water.

-  Closed hygienic system
-  Food-grade vessels
-  Contamination protection

02 / SOURCING

Selection of Fresh Petals

Only fresh, high-quality rose petals are selected and processed shortly after harvest to preserve delicate compounds.

-  Premium floral sourcing
-  Immediate processing
-  Careful inspection

03 / EXTRACTION

Controlled Steam Extraction

Warm steam passes through layers of petals in controlled units, extracting water-soluble components purely.

-  Controlled temperature
-  No additives or solvents
-  Natural clarity preserved

04 / CONDENSATION

Condensation & Collection

Steam infused with rose essence is cooled and condensed into liquid form, producing pure rose water.

-  Closed hygienic system
-  Food-grade vessels
-  Contamination protection

05 / FILTRATION

Filtration & Safe Storage

The distilled rose water undergoes micro-filtration and is stored in inert containers to maintain purity.

-  Micro-filtration process
-  Light-protected storage
-  Hygienic handling

06 / QUALITY

Batch Quality Testing

Every batch is tested for clarity, aroma, pH balance, and consistency before packaging.

-  Clarity inspection
-  Aroma consistency
-  pH verification
-  Batch traceability

ROSE WATER

Our Rose Water is a clear, aromatic floral water obtained through the traditional steam distillation of fresh rose petals. This gentle process preserves the natural essence, clarity, and fragrance of the rose without the use of alcohol, additives, or synthetic enhancers.

Carefully distilled and hygienically processed, this rose water retains its purity and stability, making it ideal for use across cosmetic, skincare, wellness, and food applications.

Key Applications

- Skincare toners & facial mists
- Cosmetic formulations
- Herbal & wellness products
- Aromatherapy & spa
- Culinary preparations
- Natural fragrance component

Product Specifications

APPEARANCE	Clear, transparent liquid
AROMA	Fresh, natural rose fragrance
PH LEVEL	Skin-friendly and balanced
COMPOSITION	100% steam distilled rose water
ADDITIVES	No alcohol, preservatives, or artificial fragrance
PROCESSING	Hygienic steam distillation & micro-filtration

Quality Assurance

Each batch undergoes strict quality checks to ensure clarity, consistency, and purity. Documentation such as COA, MSDS, and detailed specifications are available upon request.

Packaging Options

HDPE Drums

Food-grade Containers

Glass Bottles (Private Label)

Custom Volumes

Applications of Rose Water

VERSATILITY ACROSS INDUSTRIES

Skincare

A natural toner and refresher, essential for daily skin health routines.

- Facial toners & mists
- Gentle cleansers
- Hydrating serums
- Face packs

Cosmetics

A fragrant base ingredient prized for its skin-friendly properties.

- Setting sprays
- Natural fragrance base
- Herbal cosmetics
- Sensitive skin lines

Wellness & Spa

The delicate, authentic aroma of naturally distilled rose water makes it the gold standard for relaxation and high-end spa therapies.

- Aromatherapy blends
- Luxury spa treatments
- Bath and body soaks
- Stress-relief formulations
- Holistic healing bases

Food & Beverage

Traditional flavoring agent used in culinary delights.

- Gourmet desserts
- Premium beverages
- Flavoring syrups
- Confectionery

Herbal Blends

A compatible base for traditional botanical extracts.

- Herbal sprays
- Ayurvedic formulations
- Botanical extracts
- Natural remedies

NATURALLY DISTILLED • ADDITIVE-FREE • SKIN-FRIENDLY • FOOD-GRADE COMPATIBLE

Packaging Options for Rose Water

Export-ready packaging solutions designed to preserve purity, clarity, and natural aroma during storage and transportation.

HDPE Drums for Bulk Export

High-density polyethylene drums are ideal for large-volume export orders, ensuring leak-proof safety during long-haul transit.

- MULTIPLE CAPACITIES
- SECURE SEALED LIDS
- LONG-DISTANCE SAFE
- FOOD-GRADE MATERIAL

Food-Grade Cans & Containers

Practical and hygienic packaging solutions designed for medium-scale industrial requirements and ease of handling.

- EASY POURING
- LIGHT-RESISTANT
- CONTAMINATION PROOF
- IMPACT RESISTANT

Glass Bottles for Premium Use

Ideal for cosmetic, skincare, and private label usage where presentation, clarity, and purity are equally important.

- RETAIL READY
- MAINTAINS CLARITY
- PREMIUM APPEAL
- PRIVATE LABEL FRIENDLY

Private Label & Customization

Flexible packaging solutions tailored to buyer-specific requirements, supporting diverse branding and volume needs.

- CUSTOM VOLUMES
- RETAIL PACKAGING
- BRAND LABELING
- BULK OPTIONS

Packaging selected to ensure no reaction with liquid content, protection from contamination, retention of natural aroma, and safe export transit.

Private Label & Customization

Tailored solutions designed to help brands integrate our rose water seamlessly into their own product lines.

❖ Private Label Packaging

Ready-to-use packaging that allows brands to market immediately.

- Glass bottles for premium lines
- Custom bottle designs
- Strategic label placement
- Retail-ready presentation

❖ Packaging by Application

Formats selected based on end-user application.

- Skincare mist sprayers
- Cosmetic dropper bottles
- Food-grade bulk jars
- Spa & wellness pouring vessels

❖ Labeling & Branding Support

Our dedicated team ensures your brand identity is reflected clearly, elegantly, and professionally on every unit we ship.

- Private branding artwork placement
- Minimal & premium label styling
- Export-compliant label guidance
- High-quality print finishing
- Brand consistency checks

❖ Custom Volume & Sizes

Packed in volumes suited precisely to your operations.

- Bulk export drums (200L)
- Formulation jerrycans (5L-25L)
- Retail bottles (50ml-500ml)
- Sample sizing available

❖ Seamless Integration

Ensuring the product is ready for your production line.

- Adaptable packaging formats
- Buyer-specific designs
- Supply chain optimization
- Just-in-time delivery options

FLEXIBLE PACKAGING

• PRIVATE BRANDING

• APPLICATION-BASED FORMATS

• EXPORT-READY

Export Support & Contact

Reliable export practices, documentation, and communication designed to make global sourcing simple and dependable.

Documentation on Request

To meet international quality and compliance requirements, we provide detailed documentation for every batch supplied.

- Certificate of Analysis (COA)
- Material Safety Data Sheet (MSDS)
- Product Specification Sheet
- Batch Quality Reports

Export-Compliant Handling

Our packaging and handling practices are aligned with export standards to ensure product safety during long-distance transportation.

- Food-grade, inert storage
- Leak-proof packaging
- Transit-safe labeling
- Light & environmental protection

Consistency & Quality

We maintain strict quality control across all stages of processing and packaging to ensure every batch delivered matches expected clarity, aroma, and composition.

- Strict QC protocols
- Aroma consistency checks
- Purity verification

Bulk Orders & Supply

We are equipped to handle both one-time bulk orders and long-term supply requirements for international buyers with dependable communication and timely fulfillment.

- Long-term contracts
- Volume flexibility
- Timely fulfillment
